

The choice is yours: Basic, Touch or Vetro.

Different applications mean different operating patterns, which is why we are offering three different operating units. That way, you, your guests and the Spectra will always communicate perfectly, whether by keypad, touchscreen or glass panel.

Basic operating unit Proven simplicity.

In the basic version all Spectra models are fitted with the Basic keypad. The operating panel comprises ten keys, labelled according to your needs (incl. hot-water and steam dispenser). With the Shift function you can even increase your choice of products to 18. The display provides all the information you need on products dispensed, operating sequences and the machine status. A labelling area is available for each product name.

Touch operating unit

Innovative technology for limitless possibilities.

This novel operating concept with full-graphics colour display and touchscreen operation is the state of the art. All the information can be found on the display in the upper section of the operating unit. There are virtually no limits to the way in which products are displayed, with either text or images, only one or up to 20 displayed per image level. Forty products can be individually programmed in total. You can also easily display and select complex product sequences using ATM-inspired procedures. What's more, the colour display is an ideal medium for carrying advertising and information.

Vetro operating unit

Never has self-service operation been this quick or simple.

Customers instantly recognise the product they want from image and text displayed on the glass area; all they have to do is press the required sequence – and that's it! The Vetro operating unit has space for up to eight images. The product images and texts can be changed at any time. Combined with the automatic dispenser height adjustment the Vetro variant is perfect for modern self-service operation.

Frame lighting

Adapt the look of your operating unit to your surroundings by choosing the colour of the frame lighting according to your needs: red, blue, yellow or orange.
